

Beyond words: Exploring prosody in non-verbal vocalisations across diverse groups

9:30-9:35 Workshop introduction

9:35-9:55

Jürgen Trouvain

Non-verbal vocalisations in speech corpora: the case of annotating laughter

9:55-10:15

Bas Rodenburg, Sanne van Thiel, Arjen van Putten, Mona F. Giersberg, and Aoju Chen

Exploring opportunities for automatic analysis and monitoring of laying hen vocalisations

10:15-10:25 Discussion on the theme 'Analysis'

10:25-10:55 Coffee break

10:55-11:15

Elanie van Niekerk, Caroline Junge, and Aoju Chen

The role of pitch in expressing social purpose in infant babbling

11:15-11:35

Laura Smorenburg, Jill Thorson, Aoju Chen and Wolfram Hinzen

Prosodic characteristics of non-verbal vocalisations by non- or minimally verbal children and adolescents with autism: a cross-linguistic perspective

11:35-11:45 Discussion on the theme 'Abilities'

11:45-12:05 Melina Witt, Oliver Tab Bellmann, Marisa Hoeschele, and Rie Asano

Musical Aspects of Prosody and Language Evolution

12:05-12:25

Eva Hermans, Cora Nijboer, Caroline de Theije, and Marijke Achterberg

Ultrasonic vocalization emission is altered following perinatal hypoxic-ischemic brain injury in mice

12:25-12:35 Discussion on the theme 'Accounts'

12:35-12:45 General discussion and conclusion
