Application Form

Course description for application Master in Psychology (clinical specialisations)

In addition to the admission requirements, students who want to apply to one of the clinical specialisations of the Master in Psychology need to demonstrate how they score on the selection criteria:

Selection criterium 1 is a good academic record as indicator for academic excellence. Applicants must use the form on the following pages to show their achievements in three domains.

If you have taken multiple courses that correspond to the required topic, fill in the course that best meets the topic or qualitative selection criteria. You can fill in the same course for two different topics, in that case the grade can only be counted once for the weighted average. It is recommended to use a different course for each topic (if possible). There is room for additonal courses at the last page of this document. Please indicate clearly to which requirement these optional additional courses pertain.

If you encounter difficulties filling out this form, please see our Frequently Asked Questions (note, the FAQ content is the same for all clinical specialisations).

Completing this form is mandatory for application to the clinical specialisations of the Master in Psychology.

Keep in mind that the admission requirements and the selection process are two separate steps in the admissions process. Being able to complete this form does <u>not</u> mean you meet the admission requirements.This form is part of the selection process. Only applicants that meet the admission requirements can participcate in the selection process.

Requirement 1:
a. The results earned in the bachelor on **general psychology** courses on the following topics (*at least 24 ec - please make sure to list only 1 course per topic*):
   o Introduction to psychology
